

# Print Management

**One server with the ability to manage over 30,000 print queues with minimal WAN bandwidth use and reduced IT footprint.**

Cloud print is not just a print management system but an entirely reimagined printing infrastructure. We provide innovative print server reduction software with rapid ROI. A patented industry-shaping single server printing solution and the world's most efficient, simplified and scalable printing infrastructure.

**Key features:**

- A more robust and fully scalable printing infrastructure offering a compelling, competitive advantage.
- No print spool servers or wide area print traffic leaving a more robust and scalable infrastructure.
- Fully automated driver management, saving significant administration time.
- Reduced cost and environmental impact, cutting paper waste and energy use, adding to the financial and environmental benefits.
